# SATELLITE TRACKER RATE PLAN

## Plan A

Activation fee: waived

Monthly base fee: \$15 (cost per transmission is added to the base fee)

Monthly minimum: \$30

Rate per location transmission from satellite per vehicle: \$0.30 (30 cents), cost is applied toward monthly minimum fee. Fees are based on frequency of SatelliteTracker hardware transmission (rather than the frequency at which end user chooses to view the data). Typically this value is set to a period of 20 minutes (in other words, location transmission are automatically generated 3 times per hour). When ordering the SatelliteTracker hardware device, the periodicity of transmission can be configured at the end users request. The hardware frequency transmission rate can also be configured by the end user directly.

Reporting feature: \$0.60/report. Includes \$0.30 for location transmission from satellite + \$0.30 per location transmission to the satellite and/or messaging terminal.

Terms: Credit Card or Prepayment. Airtime is automatically charged monthly, fees are non-refundable.

Contract term: 1 year. Rates subject to change with one month notification, no penalty for cancellation of service.

Re-Activation fee: \$85. Applicable if you cancel airtime service, then wish to re-instate service.

## Plan B

If you are purchasing 10 or more SatelliteTrackers please contact the TeleType GPS office to obtain optimized airtime pricing based on your expected use.
